Frontiers North Adventures EV-olving Our Fleet with New Electric Vehicle Tundra Buggy

Electric Vehicle Tundra Buggy rolls out in Churchill, Manitoba.

In November 2021, Frontiers North Adventures excitedly unveiled the first Electric Vehicle Tundra Buggy® (EV Tundra Buggy). Though it may be the first of its kind, it is the start of a conversion that will see all twelve Tundra Buggies converted from diesel to electric over the next decade. The EV Tundra Buggy is an exciting innovation that will help reduce greenhouse gas emissions and reduce noise pollution allowing guests aboard silent wildlife viewing.
