

## Glenbow to Open Satellite Exhibition Space in Collaboration with Downtown Revitalization Strategy

Starting in March 2022, [Glenbow Museum](#) will inject some fresh colour into downtown Calgary when it opens a new satellite exhibition space in The Edison, at 150 9th Avenue SW. The new location will host Glenbow's feature exhibition program until Glenbow's building renovation is complete in 2024, and will offer free admission in 2022.

Glenbow is converting an empty office suite on the public +15 level of The Edison into a Class A Museum space, which includes installing specialized HVAC systems and climate controls to protect the artworks and artifacts that will be on view in the space. The goal is that this repurposed space could continue to be a cultural or creative facility even after Glenbow moves back to its own building.

The first exhibition in Glenbow's new location is *Uninvited: Canadian Women Artists in the Modern Moment*, a landmark exhibition of more than 200 works of art by a generation of extraordinary women painters, photographers, sculptors, architects, and filmmakers from a century ago — pioneers who opened new frontiers for women artists in Canada — as well as works made by their Indigenous female contemporaries working in traditional media, for a cross-country snapshot of female creativity in the dynamic modern moment of the early 20th century.
